

Job ID: 08-09-07
Job Title: Reliability Engineer / Supervisor
Degree Requirements: Bachelors Engineering Degree (BSME, BSIE, BSEE, BSChE)
Years of Experience: 5
Location: Eastern Kansas
Salary Range: \$70 - \$100 *
Travel Required: Yes

A well-respected client located in Eastern Kansas is actively searching for a Reliability Engineer to lead a team of professionals devoted to providing reliability services to the owner operated power plants. This corporate level position will actively participate in the Generation Steering Committees to aid in guiding the client down a successful road to produce safe and efficient electrical power for its customers. If you are ready for a supervisor's position and want to build a long lasting career then submit your resume today.

Job Responsibilities are:

- Originate and develop analysis methods for determining reliability of plant equipment and processes at all of the company's energy centers
- Proficient use of computer applications and data systems including computerized maintenance management systems "CMMS"
- Performing statistical reliability analysis studies
- You will actively participate in the Generation Steering Committee meetings
- You will travel to perform onsite investigations and studies at each power plant
- Facilitate the implementation of RCM and RCA methods at all energy centers

Candidates applying for this position are required to have bachelor's degree in Mechanical, Industrial, Electrical or Chemical Engineering from an ABET* accredited program. Candidates need to have experience in, and knowledge of, plant operations, maintenance, and business activities and practices. You must be able to read and understand plant technical documents including operations and maintenance manuals, technical drawings, schematics, logic diagrams and safety materials.

The position requires candidates to have experience with and knowledge of plant and equipment reliability improvement methods and calculations. The knowledge of applicable governing codes and regulations is a must. You must be able to work in a team environment and guide the team to successful conclusions.

Benefits:

Very good medical, dental, and life insurance packages
Relocation package
Retirement Plan and 401K Plan
Sick Leave

*Salary range depends on your experience and knowledge
