    - Citrix
    - Terminal Services
    - SQL(Writing Scripts)
    - SQL Server(Administration/Support)
    - Firewall Support
- Desired Certifications: MCSE or any Cisco Certifications

Your Responsibilities will include but are not limited to:

- Collaborate with network staff to ensure smooth & reliable operations & systems for fulfilling business objectives and processes
- Work with executive team members, decision makers and stick holders to define business requirements and systems goals and to identify and resolve business systems issues
- Design & deploy new applications & enhancements to existing applications, software & operating systems
- Perform cost-benefit & efficiency of existing systems to aid management in making implementations decisions
- Conduct research on software & systems products to justify recommendations & to support purchasing efforts
- Interact& negotiate with vendors, outsource and contractors to secure system-related products & services
- Gauge the effectiveness & efficiency of existing systems, develop & implement strategies for improving or further leveraging these systems
- Propose & create design models, specifications, diagrams & charts to provide direction to system programmer & development teams
- Design & perform server & security audits, system backups procedures, & other recovery processes in accordance with the company's disaster recovery & business continuity strategies
- Integrate servers including database, e-mail, print, back up servers & their associated software into enterprise systems
- Ensure system connectively of all servers, shared software, groupware, & other applications
- Create, maintain documentation as it relates to system configuration, mapping, processes & service records
- Ensure compatibility & interoperability of in-house computing systems

- Coordinate & perform in-depth test including end-user reviews for modified and new systems
- Monitor & test system performance, prepare & deliver system performance statistics & reports
- Provide orientation & training to end users for all modified & new systems
- Perform other duties as assigned
