IMMEDIATE NEED for a Construction Engineer who has a minimum of 10 years construction experience in the Chemical, Petro-Chemical, or Refinery Construction arena and who holds a Bachelor's degree. Technical know-how gained through experience will also be considered. The position is bonus eligible and relocation assistance is available.

The **MUST HAVE** items for this position are:

- Be willing to travel extensively & relocate for long term temporary assignments in North America
- Have or be able to obtain TWIC Card (Transportation Worker Identification Credential)
- Have expertise with Petro-Chemical plant construction techniques & various engineering design Disciplines
- Have complete familiarity with quality control techniques as they apply to the construction Industry
- Experience managing non-technical construction phases (planning, scheduling, receipt of materials, progress tracking)
- Have a basic understanding of contracts and be able to enforce contracts
- Be knowledgeable in construction and chemical plant safety requirements

PLUSSES in this position are:

- Membership and participation in professional organizations related to the chemical plant construction industry

The **RESPONSIBILITIES** include but are not limited to:

- Represent the company on large construction projects
- Management of the construction site regarding safety, quality, schedule, cost, & specifications compliance
- Work with internal & external customers (Project Team, Construction Contractors, Operations, Engineering) in regard to installation and execution as well as the resolution of field problems
- Provide technical expertise and consultation (constructability) in the design, contract development / bidding, and construction phases of projects
- Coordinate site visits, interpret bid specifications
- Providing and maintaining a safe worksite
- Have pro-active involvement with contractors to prevent accidents & injuries
- Conducts incident investigations if necessary
- Monitors contractors & provide guidance to ensure full understanding of the scope & minimize construction claims
- Analyze & choose low cost alternatives in execution of the work
- Continually inspect work assuring that job schedules are maintained & that work is being performed safely & per codes & design specifications
